

Physiology - blood (10 yr imp que)

(5 star - red color)

1. Function of plasma proteins (Pg 57)
2. Erythropoiesis and its stages and regulation(Pg 69)
3. Etiological classification of anemia, pernicious anemia , iron deficiency anemia (Pg 73)
4. Jaundice (Pg 81)
5. Function of Wbc (Pg 84)
6. Phagocytosis (Pg 88)
7. Haemostasis (Pg 98)
8. Extrinsic and intrinsic mechanism of clotting (Pg 101)
9. Anticoagulants (Pg 103)
10. Erythroblastosis foetalis (pg 111)
11. Macrophages (Pg 117)
12. Immunoglobulins (pg 128)
13. Regulation of immunity (pg 130)
14. Thalassemia (pg 64)
15. Foetal haemoglobin (pg 63)
