

Physiology - Excretion 10 yr imp que

(5 star- red color)

1. Jg apparatus (pg 510)
2. Endocrine function of kidney (pg 513)
3. Peculiarities of renal circulation (pg 515)
4. GFR - factor affecting and regulation (pg 522)
5. Factor affecting Na reabsorption (pg 531)
6. Plasma/Renal clearance application (pg 542)
 - A. As a measure of GFR
7. Characteristic of substance for Gfr (pg 542)
8. Concentration of urine - counter current mechanism [Multiplier and exchanger] (pg 549)
9. Acidification of urine (pg 557)
10. Role of ADH in water excretion (pg 564)
11. Raas mechanism (pg 565)
12. Micturition reflex (pg 581)
13. Cystometrogram (pg 581)
14. Pathophysiology of fever (pg 593)
