

Physiology - Respiration 10yr imp que

(5 star - red color)

1. Non respiratory function of respiratory sys (pg 407)
2. Intra pulmonary and pleural pressure changes during respiration (pg 413)
3. Functional residual volume - significance and factors affecting it (pg 416)
4. Time vital capacity (pg 416)
5. Surfactant - action , significance ,factors and applie (pg 419)
6. Compliance of lung(pg 421)+ (fig.46.12)
7. Reynolds number (pg 424)
8. Physiological dead space (pg 426)
9. Ventilation perfusion ratio (pg 427)
10. Oxy-Hb dissociation curve + its significance (pg 435)
11. Co₂ transport (pg 438)
12. Neural + Automatic control of respiration (pg 444)
13. Periodic breathing and Cheyne- stroke respiration (pg 456)
14. Hypoxia (pg 461)
15. Cyanosis (pg 467)
16. Acclimatization (pg 473)
17. Caissons disease or dysbarism (pg 477)
18. Physiological effect of physical training (pg 487)
